PROFILE

As an engineer and a web developer, I am able to merge engineering with coding to develop efficient and creative web solutions. My previous work experience in the business side of healthcare enables me to acknowledge business core values and prioritize tasks to manage costs as well as to leverage a company's profitability.

SKILLS

HTML5 Cascading Style Sheets JavaScript jQuery Node.js Express.js PostgreSQL Photoshop
InDesign Microsoft Office Illustrator Team Leadership Project Management AJAX

EXPERIENCE

GENERAL ASSEMBLY

New York, USA
2017-2017

Web Development Immersive Program

- Project 1: Connect 4 - A two players game, which the goal is to get four pieces of the same color connected in a row, vertically or diagonally. Technologies used: HTML5, CSS, and Javascript. (<https://github.com/dkoreeda/connect4>)
- Project 2: Travel Planner - A web application developed to help travelers to create their own itinerary or save wishlist with places of a specific city. Technologies used: HTML5, CSS, jQuery, Node.js, Google Maps API, PostgreSQL. (MVC structure - <https://github.com/dkoreeda/unconventional-trip>)
- Project 3: Attender - A web application developed to help teachers to take students attendance in class. Technologies used: HTML5, CSS, jQuery, Ruby on Rails, Google Maps API, and PostgreSQL. (MVC structure - <https://attender.herokuapp.com/>)
